PRE-SERIALIZED LABEL SOLUTION

SICPA'S GS1 COMPLIANT PRE-SERIALIZED LABEL SOLUTION

SICPA

Enabling trust

DID YOU KNOW YOU CAN SIMPLY SERIALIZE WITH GS1-COMPLIANT LABELS?

Do you need time to evaluate what is the best serialization strategy for you?

Do you need time for modifying your production lines to implement an automated serialization solution?

Or you simply want an easy way to quickly be compliant with standardized serialization requirements?

The SICPA pre-serialized label solution is GS1-compliant and is here for you!

ORDER
Simply place an order.

APPLY
The Labels can be applied manually or using off-the-shelf label applicators (recommendation upon request).

AGGREGATE
Furthermore, you can aggregate your production in the same operation, resulting in saving precious time.

RECEIVE
Receive pre-serialized labels with the required regulatory code printed.

COMMISSION
Our software "Serialization Manager" is a web application allowing you to efficiently commission each code in the system with a hand scanner.
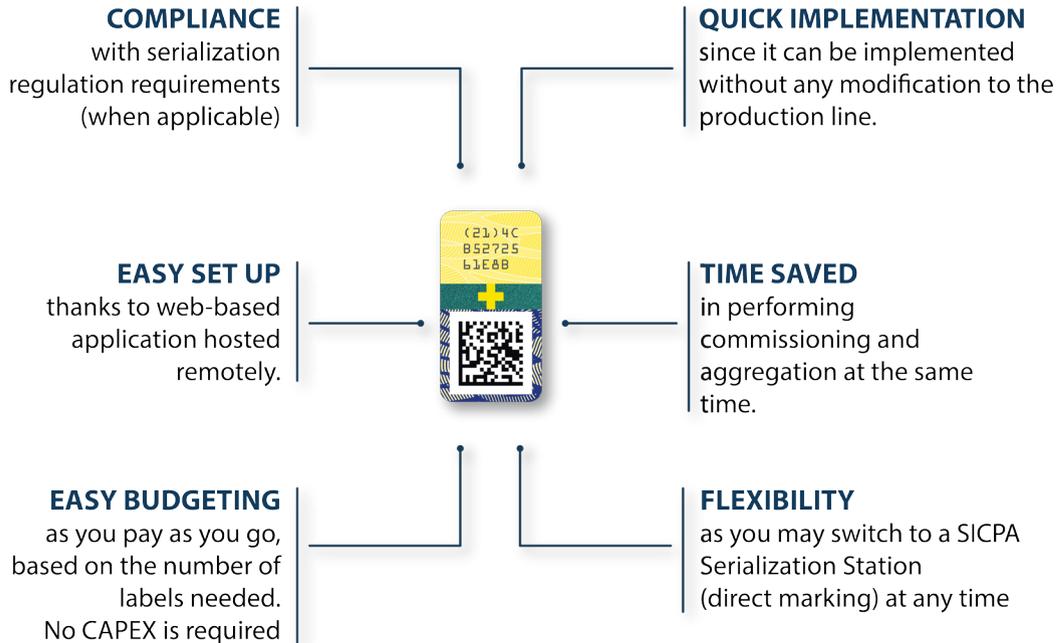

DOCUMENT
Finally, use the Serialization Manager to submit the serialization and aggregation data to the National repository in the required format.

AN
INFRASTRUCTURE
FREE SOLUTION

Our GS1-compliant pre-serialized label solution can be implemented without the need to install any equipment on the production line or in your data center. It can also be used in conjunction with the SICPA aggregation and tamper-evident stations:

COMPLIANCE
with serialization regulation requirements (when applicable)

QUICK IMPLEMENTATION
since it can be implemented without any modification to the production line.

EASY SET UP
thanks to web-based application hosted remotely.

TIME SAVED
in performing commissioning and aggregation at the same time.

EASY BUDGETING
as you pay as you go, based on the number of labels needed. No CAPEX is required

FLEXIBILITY
as you may switch to a SICPA Serialization Station (direct marking) at any time

GS1 COMPLIANT LABELS

ENABLING TRUST
IN PRODUCT
IDENTIFICATION

The SICPA service approach to serialization is based on over 90 years' experience in understanding and accompanying the most demanding customers worldwide. SICPA has established long term relationships with partners and clients in countries across the globe and in varying regulatory environments, including the pharmaceutical industry. SICPA's competences are applicable to serialization technology and authentication solutions for regulatory and fiscal authorities as well as for major industry players.

SICPA systems have been used to apply unique serialized codes to hundreds of billions of products globally, on a broad range of production lines. SICPA's global footprint, local alliances and service oriented approach are what make SICPA a safe and reliable partner to accompany your company on your pharma serialization journey.
